

Pine Grove Community Church

CASE STUDY

Energy Management Service helps community church save thousands on their energy bills.

Pine Grove Community Church was looking for a way to reduce their energy bills, so they decided to install the TECS wireless Energy Management System in October 2019. Along with their normal church functions at their facility, they also run the Community Christian School, which is a faith-based elementary school, pre-school, and day care teaching 100 students. Pine Grove Community Church had 11 programmable thermostats throughout their 25,000 square foot facility, and a dedicated volunteer in charge of weekly programming and trouble shooting.

In October 2019, they installed the TECS wireless energy management system in place of their 11 programmable thermostats. **They saw instant savings in their energy bills, averaging a \$663 savings per month.** Their kWh consumption was reduced by 42% by making sure they were only running their HVACs when rooms were occupied. Scheduling became much easier using TECS online programming, where they could create specific programs aligned with how each room is used. TECS has also saved their volunteer countless hours of thermostat programming and trouble shooting. They installed TECS through the PG&E on bill financing program, and the savings after 10 months have been enough to pay for TECS!

CASE STUDY

“ **The TECS wireless EMS has saved us a significant amount of money.** It’s simple to program for how we use our facility, running our main sanctuary on Sunday mornings, and our school and office during the week. I can easily update the programs when different rooms will be used. We’ve been very happy with this system and all of the money that we have saved! I highly recommend installing TECS.

”

Elder Ryan Thompson,
Pine Grove Community Church

“ Before we installed TECS I was running to the church weekly to update each thermostats programming, as well as each time there was a complaint. **Installing these WIFI thermostats has saved me hours every week along keeping our congregation comfortable.**

”

Elder Ray Stall,
Pine Grove Community Church
